

You're invited to join the

Missouri Chat on Reading across the Curriculum

This new **GPSNetwork.org** group focuses on strategies, techniques and components of reading in subject areas. Improved comprehension of readings in your subject helps your class function at a higher level. Teachers, tutors, mentors, and paraprofessionals at all grade levels are invited to join the facilitated Missouri Chat for online discussions and sharing resources. Even volunteer tutors can join, you do not have to be a Missouri NEA member. The group is especially helpful for those who work with students in grades 4-12.

Group members are encouraged but not required to take the free NEA Academy self-study course *Reading Across the Curriculum*. This free course, available only to Missouri NEA members, provides useful strategies that are easy to put into practice. The Missouri Chat on Reading group supports you as you apply new learning in your classroom. Paraprofessionals who work with students on reading skills also find this course helpful. Details below.

Reading Across the Curriculum Course
